

**Plasmid name :** 6sub6-AUG-β-gal

**Plasmid size :** 11300 bp

**Constructed by :** E. Dodou/D. McCulley (Black lab)

**Construction date :** June 2003

**Comments/References :** 6sub6 blunted as XhoI-SalI into SmaI site in AUG-β-gal.6sub6 includes its own promoter at the 3' end. Sufficiency region (w/o endog. promoter) is from Scal (2631) to Xma I (3057).The RI site at 3' end of lacZ has been mutated.aka F6/Frag3; mef2-AHF-lacZ
